Massinissa SMAIL

CS Valedictorian @ Paris-Saclay · Customer Engineer @ Google Cloud

+33 7 64 00 21 53 smailmassinissa.pro@gmail.com linkedin.com/in/massinissa-smail/ github.com/msmail723

Education

Master's in Data Science (ISD : Year 1 of 2) — GPA : 17.1/20 · Valedictorian **Sept 2025 – Present**
Université Paris-Saclay · Orsay, France
- Key modules: Advanced Machine Learning · Statistical Learning · NLP · Distributed Systems · Data Engineering

BSc Computer Science — GPA : 16.4/20 · Top of cohort **Sept 2022 – Jun 2025**
Université Paris-Saclay · Orsay, France
- Key modules: Algorithms & Complexity · Operating Systems · Database Systems · Object-Oriented Programming · Computer Networks · Probability & Statistics

Baccalauréat Scientifique — GPA : 16.86/20 · Mention Très Bien · Mathematics & Physics **Sept 2021 - Jun 2022**
Lycée International Alexandre Dumas

Experience

Customer Engineer (Apprenticeship) **Sept 2025 – Present**
Google Cloud · Paris, France
- Co-managed the entire **Bolloré Group** account alongside my mentor, delivering technical engagements across Canal+, Vivendi (Gameloft), Havas, and Louis Hachette Group.
- Built **GenAI agents** for two Bolloré clients: visual asset generation pipeline (Gemini, Vertex AI) for **Gameloft** designers, and a retail space visualization agent (Veo3, FastAPI, React, Cloud Run) generating 3D visuals for **Lagardère Travel Retail**.
- Led a **cloud migration assessment** (AWS → GCP) for Canal+, evaluating infrastructure, costs and architecture recommendations.
- Configured a **GCP Landing Zone** for LTR migrating from Azure: IAM structure, billing accounts, org policies and tenant setup.
- Delivered a **BigQuery pitch** (RFP response) for Hachette, presenting a full data platform architecture to technical and business leadership.

IT Technician (Freelance) **Jun 2024 – Sept 2024**
SCC France · Olympic Village, Saint-Ouen, Paris
- Administered Linux/Windows servers and managed access control for critical infrastructure during the **Paris 2024 Olympic Games**, within a multinational engineering team.

Data Analyst Intern **Apr 2024 – Jun 2024**
Air Algérie · Algiers, Algeria
- Preprocessed and analyzed customer booking data (Python, Pandas, NumPy, Scikit-learn, SQL) to optimize reservation management and air traffic forecasting.
- Visualized results with Matplotlib, Seaborn and Power BI; produced reports for decision-making teams.

Projects

Image Enhancement API | *PyTorch · FastAPI · Docker · GCP* **In progress**
- Fine-tuning an ESRGAN super-resolution model wrapped as a production REST API, will be deployed on Cloud Run.

GCP Cost Intelligence | *Python · BigQuery · Scikit-learn · Streamlit · Cloud Run* **2025**
- Internal tool (Google Cloud) ingesting GCP billing exports and applying ML anomaly detection + time-series forecasting to predict monthly cloud costs, deployed serverlessly on Cloud Run.
- Code proprietary : developed as part of client engagement work at Google.

Deep Learning Image Classifier (CIFAR-10) | *TensorFlow/Keras* | link **2024**
- Custom CNN achieving **91.3% test accuracy** via hyperparameter tuning and data augmentation, outperforming a baseline ResNet.

Building Energy Consumption Predictor | *Scikit-learn · PCA · Matplotlib* | link **2024**
- Random Forest & Gradient Boosting with PCA dimensionality reduction; achieved $\mathbf{R^2 = 0.94}$ on held-out test data.

Certifications

Google Professional Cloud Architect - Google cloud - *obtained in 3 weeks* · verify **2025**
Google Professional Data Engineer - Google cloud *(expected April 2026)* **2026**

Technical Skills

Cloud: Google Cloud Platform (BigQuery, Vertex AI, GKE, Cloud Run, Pub/Sub, IAM)
ML / Data: Python, Scikit-learn, TensorFlow, Keras, PyTorch, Pandas, NumPy, SQL, Power BI
Engineering: Docker, FastAPI, Git, Linux, C/C++, Java, JavaScript, React, PHP, Angular
Competitive: LeetCode · Codeforces
Languages: French (native) · English (C1) · Kabyle (native)

Extracurricular

Sports: Weightlifting · Football · Chess
Community: Mentor for first-year CS students at Paris-Saclay : helping peers with algorithms, programming fundamentals and university life
